

Global Innovation Index 2025

China ranking in the Global Innovation Index 2025

China ranks **10th** among the 139 economies featured in the GII 2025.

The Global Innovation Index (GII) ranks world economies according to their innovation capabilities. Consisting of roughly 80 indicators, grouped into innovation inputs and outputs, the GII aims to capture the multi-dimensional facets of innovation.

China ranks 1st among the 36 Upper middle-income group economies.

China ranks 3rd among the 17 economies in South East Asia, East Asia, and Oceania.

> China GII Ranking (2020-2025)

The table shows the rankings of China over the past six years. Data availability and changes to the GII model framework influence year-on-year comparisons of the GII rankings. The statistical confidence interval for the ranking of China in the GII 2025 is between ranks 4 and 11.

Year	GII Position	Innovation Inputs	Innovation Outputs
2020	14th	26th	6th
2021	12th	25th	7th
2022	11th	21st	8th
2023	12th	25th	8th
2024	11th	23rd	7th
2025	10th	19th	5th

China performs better in innovation outputs than innovation inputs in 2025.

This year China ranks 19th in innovation inputs. This position is higher than last year.

China ranks 5th in innovation outputs. This position is higher than last year.

China has 24 clusters in the world's top innovation clusters of the Global Innovation Index.

Global Innovation Index 2025

> Global Innovation Tracker

The Global Innovation Tracker 2025 shows what is the current state of innovation in China, how rapidly is technology being embraced and what are the resulting societal impacts.

For China, 9 indicators have improved in the short-term and 4 indicators have worsened.

Science and innovation investment

	Scientific publications	R&D investments	Venture capital deal numbers	International patent filings
Short term	▲ 14.4 % 2023 - 2024	▲ 9 % 2022 - 2023	▼ -20.8 % 2023 - 2024	▲ 0.9 % 2023 - 2024
Long term (annual growth)	▲ 11.9 % 2014 - 2024	▲ 9 % 2013 - 2023	▼ -1.1 % 2020 - 2024	▲ 10.6 % 2014 - 2024

Technology adoption

	Safe sanitation	Connectivity		Robots	Electric vehicles
		Fixed broadband	5G		
Short term	▲ 0.7% 2023 - 2024	▲ 7.9% 2022 - 2023	▲ 17.5% 2022 - 2023	▲ 16.9% 2022 - 2023	▲ 56% 2023 - 2024
Long term (annual growth)	▲ 4.1% 2014 - 2024	▲ 12.9% 2013 - 2023	n/a	▲ 29.5% 2013 - 2023	▲ 82.1% 2014 - 2024
Penetration	68.9 per 100 inhabitants in 2024	44.7 per 100 inhabitants in 2023	94 per 100 inhabitants in 2023	n/a	11 per 100 cars in 2024

Socioeconomic impact

	Labor productivity	Life expectancy	Temperature change
Short term	▲ 5.9 % 2023 - 2024	▼ -0.3 % 2022 - 2023	+ 2.3 °C 2024
Long term (annual growth)	▲ 6.6 % 2014 - 2024	▲ 0.2 % 2013 - 2023	+ 1.1 °C 2014
Level	51,455 USD in 2024	78 years in 2023	n/a

Notes: Not all indicators of the Global Innovation Tracker are used to calculate the Global Innovation Index. Long-term annual growth refers to the compound annual growth rate (CAGR) over the indicated period. For each variable, a one-year growth rate is set for the short run, and ten-year CAGR is set for the long run; time windows might differ when gaps exist in data availability. The end period corresponds to the most recent available observation, which may differ among countries. Temperature change is an exception: it indicates the change in degrees Celsius with respect to the average temperature in the countries. from 1951–1980. Figures are rounded.

Global Innovation Index 2025

Expected vs. Observed Innovation Performance

The bubble chart below shows the relationship between income levels (GDP per capita) and innovation performance (GII score). The trend line gives an indication of the expected innovation performance according to income level. Economies appearing above the trend line are performing better than expected and those below are performing below expectations.

China is an Innovation leader, ranking in the top 25 of the GII.

> Innovation overperformers relative to their economic development

Global Innovation Index 2025

Effectively translating innovation investments into innovation outputs

The chart below shows the relationship between innovation inputs and innovation outputs. Economies above the line are effectively translating costly innovation investments into more and higher-quality outputs.

China produces more innovation outputs relative to its level of innovation investments.

> Relationship between innovation inputs and outputs

Global Innovation Index 2025

Overview of China's rankings in the seven areas of the GII in 2025

The chart shows the ranking for each of the seven areas that the GII comprises. The strongest areas for China are those that rank above the GII (shown in blue) and the weakest are those that rank below.

Highest Rankings

China ranks highest in Knowledge and technology outputs (1st), Infrastructure (6th) and Business sophistication (8th).

Lowest Rankings

China ranks lowest in Institutions (44th), Human capital and research (20th) and Creative outputs (14th).

The full WIPO Intellectual Property Statistics profile for China can be found on <https://www.wipo.int/edocs/statistics-country-profile/en/cn.pdf>

Global Innovation Index 2025

Benchmark of China against other economy groupings for each of the seven areas of the GII Index

Upper middle-income economies

China performs above the Upper middle-income group average in all pillars.

South East Asia, East Asia, and Oceania

China performs above the regional average in Human capital and research, Infrastructure, Market sophistication, Business sophistication, Knowledge and technology outputs, Creative outputs.

Institutions

Human capital and research

Infrastructure

Market sophistication

Business sophistication

Knowledge and technology outputs

Creative outputs

Global Innovation Index 2025

Innovation strengths and weaknesses in China

The table below gives an overview of the indicator strengths and weaknesses of China in the GII 2025.

China's best-ranked innovation strengths are **Creative goods exports, % total trade** (rank 1), **Domestic market scale, bn PPP\$** (rank 1) and **Industrial designs by origin/bn PPP\$ GDP** (rank 1).

Strengths

Rank	Code	Indicator name
1	7.2.4	Creative goods exports, % total trade
1	4.3.3	Domestic market scale, bn PPP\$
1	7.1.4	Industrial designs by origin/bn PPP\$ GDP
1	2.1.4	PISA scales in reading, maths and science
1	7.1.2	Trademarks by origin/bn PPP\$ GDP
1	6.1.3	Utility models by origin/bn PPP\$ GDP
2	5.1.5	GERD financed by business, %
2	3.2.3	Gross capital formation, % GDP
2	6.2.1	Labor productivity growth, %
2	4.2.3	Late-stage VC deal count, % global VC
2	6.1.1	Patents by origin/bn PPP\$ GDP
2	5.2.4	State of cluster development [†]
3	4.1.2	Domestic credit to private sector, % GDP
3	3.3.3	ISO 14001 environment/bn PPP\$ GDP
3	2.3.3	Global corporate R&D investors, top 3, mn USD

Weaknesses

Rank	Code	Indicator name
110	5.3.4	FDI net inflows, % GDP
107	2.2.3	Tertiary inbound mobility, %
105	5.1.3	Youth demographic dividend, %
102	3.3.1	GDP/unit of energy use
94	1.2.1	Regulatory quality*
83	5.3.3	ICT services imports, % total trade
76	2.1.1	Expenditure on education, % GDP
76	7.2.2	National feature films/mn pop. 15–69
43	4.1.3	Loans from microfinance institutions, % GDP
34	7.2.3	Entertainment and media market/th pop. 15–69

Global Innovation Index 2025

China's innovation system

As far as practicable, the plots below present unscaled indicator data.

> Innovation inputs in China

2.1.1 Expenditure on education

was equal to 4.02 % GDP in 2022, up by 0.04 percentage points from the year prior – and equivalent to an indicator rank of 76.

2.3.1 Researchers

was equal to 2129.08 FTE per million population in 2023, up by 13.97% from the year prior – and equivalent to an indicator rank of 42.

2.3.2 Gross expenditure on R&D

was equal to 2.58 % GDP in 2023, up by 0.08 percentage points from the year prior – and equivalent to an indicator rank of 14.

2.3.4 QS university ranking

was equal to an average score of 85.1 for the top three universities in 2024, up by 2.25% from the year prior – and equivalent to an indicator rank of 4.

4.3.2 Domestic industry diversification

was equal to an index score of 0.074 in 2018, up by 5.04% from the year prior – and equivalent to an indicator rank of 5.

Global Innovation Index 2025

> Innovation outputs in China

6.1.1 Patents by origin

was equal to 1.52 million patents in 2023, up by 4.11% from the year prior – and equivalent to an indicator rank of 2.

6.2.2 Unicorn valuation

was equal to 3.6 % GDP in 2025, up by 0.15 percentage points from the year prior – and equivalent to an indicator rank of 13.

6.2.4 High-tech manufacturing

was equal to 6.78 high-tech manufacturing output in trillion USD in 2018, down by 6.09% from the year prior – and equivalent to an indicator rank of 11.

6.3.2 Production and export complexity

was equal to a score of 1.4 in 2022 – and equivalent to an indicator rank of 17.

6.3.3 High-tech exports

was equal to 798.21 billion USD in 2023, down by 12.11% from the year prior – and equivalent to an indicator rank of 5.

7.1.1 Intangible asset intensity, top 15

was equal to 62.76 % for the top 15 companies in 2024, down by 7.04 percentage points from the year prior – and equivalent to an indicator rank of 29.

7.1.3 Global brand value, top 5,000

was equal to 1.81 trillion USD in 2025, up by 2.84% from the year prior – and equivalent to an indicator rank of 18.

7.2.2 National feature films

was equal to 792 films in 2023, up by 108.42% from the year prior – and equivalent to an indicator rank of 76.

Global Innovation Index 2025

China's innovation top performers

Disclaimer: This section contains only the top performers per country. For the complete list, please visit the [GII Innovation Ecosystems and Data Explorer website](#).

2.3.3 Global corporate R&D investors from China

Rank	Firm	Industry	R&D [mn EUR]	R&D Growth [%]	R&D Intensity [%]
1	HUAWEI INVESTMENT & HOLDING	Technology Hardware & Equipment	19,939	2	22
2	TENCENT	Software & Computer Services	8,118	6	11
3	ALIBABA GROUP HOLDING	Software & Computer Services	6,620	-8	6
4	CHINA STATE CONSTRUCTION ENGINEERING	Construction & Materials	5,830	-6	2

Source: WIPO, based on European Commission's Joint Research Centre (<https://iri.jrc.ec.europa.eu/scoreboard/2024-eu-industrial-rd-investment-scoreboard>) and Orbis database (<https://www.moodys.com/web/en/us/capabilities/company-reference-data/orbis.html>).
Note: Data is based on the 2024 EU Industrial R&D Investment Scoreboard from the European Commission's Joint Research Centre, which ranks the top 2,000 firms by R&D investment annually. For countries not represented in the Scoreboard, companies from Orbis with R&D expenditure above USD 50 million were identified and used to complement the dataset.

2.3.4 QS university ranking of China's top universities

Rank	University	Score
14	PEKING UNIVERSITY	88.50
20	TSINGHUA UNIVERSITY	86.50
39	FUDAN UNIVERSITY	80.30

Source: QS Quacquarelli Symonds Ltd (<https://www.topuniversities.com/university-rankings/world-university-rankings/2024>).
Note: QS Quacquarelli Symonds Ltd annually assesses over 1,200 universities across the globe and scores them between [0,100]. Ranks can represent a single value 'x', a tie 'x=' or a range 'x-y'.

5.2.3 University industry and international engagement, top 5 universities

Rank	University	Score
1	PEKING UNIVERSITY	85.00
2	TONGJI UNIVERSITY	84.55
3	ZHEJIANG UNIVERSITY	80.65

Source: Times Higher Education (THE), World University Rankings 2025.
Note: Rank corresponds to within economy ranks. The score is calculated as the average of the International Outlook score (encompassing international staff, students, and co-authorship) and the industry score (reflecting industry income and patent citations). The 2025 ranking corresponds to data from the academic year that ended in 2022.

Global Innovation Index 2025

6.2.2 Top Unicorn Companies in China

Rank	Unicorn Company	Industry	City	Valuation, bn USD
1	BYTEDANCE	Media & Entertainment	Beijing	300
2	XIAOHONGSHU	Media & Entertainment	Shanghai	17
3	YUANFUDAO	Consumer & Retail	Beijing	16

Global Innovation Index 2025

Data Availability

The following tables list indicators that are either missing or outdated for China.

China has missing data for seven indicators and outdated data for seven indicators.

Missing data for China

Code	Indicator name	Economy year	Model year*	Source
2.1.2	Government funding/pupil, secondary, % GDP/cap	n/a	2021	UNESCO Institute for Statistics
2.1.3	School life expectancy, years	n/a	2023	UNESCO Institute for Statistics
2.2.2	Graduates in science and engineering, %	n/a	2022	UNESCO Institute for Statistics; Eurostat; OECD
5.1.1	Knowledge-intensive employment, %	n/a	2024	International Labour Organization
5.1.2	Females employed w/advanced degrees, %	n/a	2024	International Labour Organization
7.3.2	GitHub commits/mn pop. 15–69	n/a	2024	GitHub; United Nations, Department of Economic and Social Affairs, Population Division, World Population Prospects 2024
7.3.3	Mobile app creation/bn PPP\$ GDP	n/a	2024	data.ia (a Sensor Tower Company); International Monetary Fund

*Model year corresponds to the most frequent data year (the year that appears most often across all economies in the GII).

Outdated data for China

Code	Indicator name	Economy year	Model year*	Source
1.3.1	Policy stability for doing business ⁺	2022	2024	World Economic Forum, Executive Opinion Survey (EOS)
2.1.1	Expenditure on education, % GDP	2022	2023	UNESCO Institute for Statistics
2.1.4	PISA scales in reading, maths and science	2018	2022	OECD, PISA
4.3.2	Domestic industry diversification	2018	2022	United Nations Industrial Development Organization (UNIDO)
5.2.2	University–industry R&D collaboration ⁺	2022	2024	World Economic Forum, Executive Opinion Survey (EOS)
5.2.4	State of cluster development ⁺	2022	2024	World Economic Forum, Executive Opinion Survey (EOS)
6.2.4	High-tech manufacturing, %	2018	2022	United Nations Industrial Development Organization (UNIDO)

Global Innovation Index 2025

*Model year corresponds to the most frequent data year (the year that appears most often across all economies in the GII).

Top innovation clusters in China

China has 24 clusters in the world's top innovation clusters of the Global Innovation Index

The table and map below give an overview of the top innovation clusters in China.

Rank	Cluster name	Top patent field	Top academic subject
1	Shenzhen–Hong Kong–Guangzhou	Digital communication	Engineering
4	Beijing	Digital communication	Engineering
6	Shanghai–Suzhou	Computer technology	Engineering
13	Hangzhou	Computer technology	Engineering
15	Nanjing	Computer technology	Engineering

Global Innovation Index 2025

The table and map below give an overview by intensity of the top innovation clusters in China.

Rank	Cluster name	Top patent field	Top academic subject
4	Ningde	Electrical machinery, apparatus, energy	Chemistry
18	Beijing	Digital communication	Engineering
25	Hangzhou	Computer technology	Engineering
36	Nanjing	Computer technology	Engineering
44	Qingdao	Thermal processes and apparatus	Engineering

Global Innovation Index 2025

About the Global Innovation Index

- The Global Innovation Index (GII) is published by the World Intellectual Property Organization (WIPO), a specialized agency of the United Nations.
- Recognizing that innovation is a key driver of economic development, the GII aims to provide an innovation ranking and rich analysis referencing around 140 economies. Over the last decade, the GII has established itself as both a leading reference on innovation and a "tool for action" for economies that incorporate the GII into their innovation agendas.

The Index is a ranking of the innovation capabilities and results of world economies. It measures innovation based on criteria that include institutions, human capital and research infrastructure, credit, investment, linkages, the creation, absorption and diffusion of knowledge and creative outputs.

The GII has two sub-indices: the Innovation Input Sub-Index and the Innovation Output Sub-Index, and seven pillars, each consisting of three sub-pillars.
